

Procedure to Upload practicals in GitHub.com

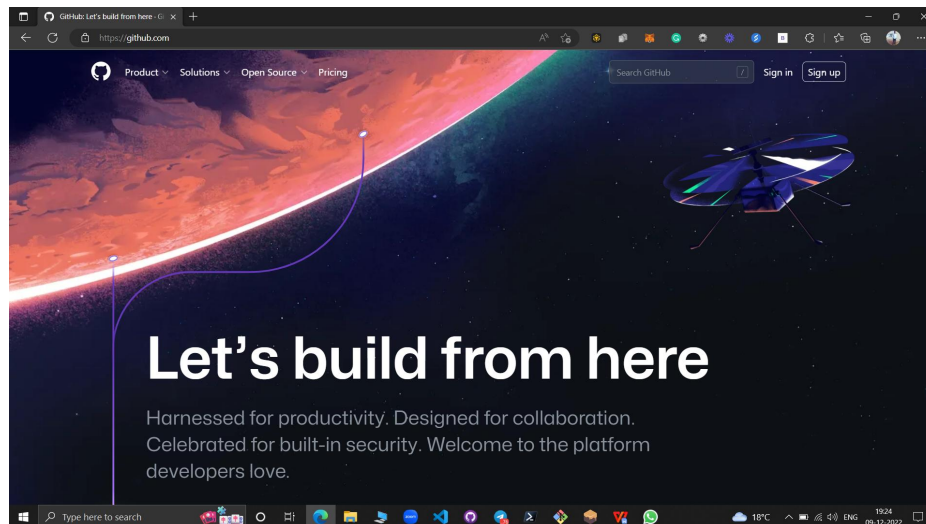

Steps to be followed for uploading practicals in GitHub.com:

Step:1

Create a file with a appropriate extension of your respective practical work and type the practical work which you are assigned to be demonstrated.

Step:2

After completing the practical work open any browser of wish and type <https://github.com/> and hit enter.

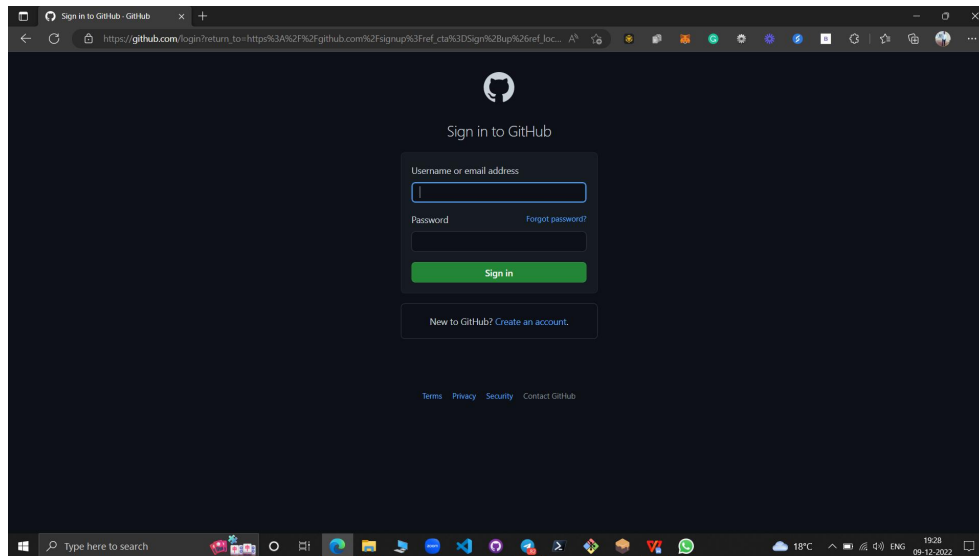

Step:3

Once the homepage of GitHub.com is opened then try to create to an account in GitHub.com or if you have already having an account then sign-in using your username and password for logging into GitHub.com.

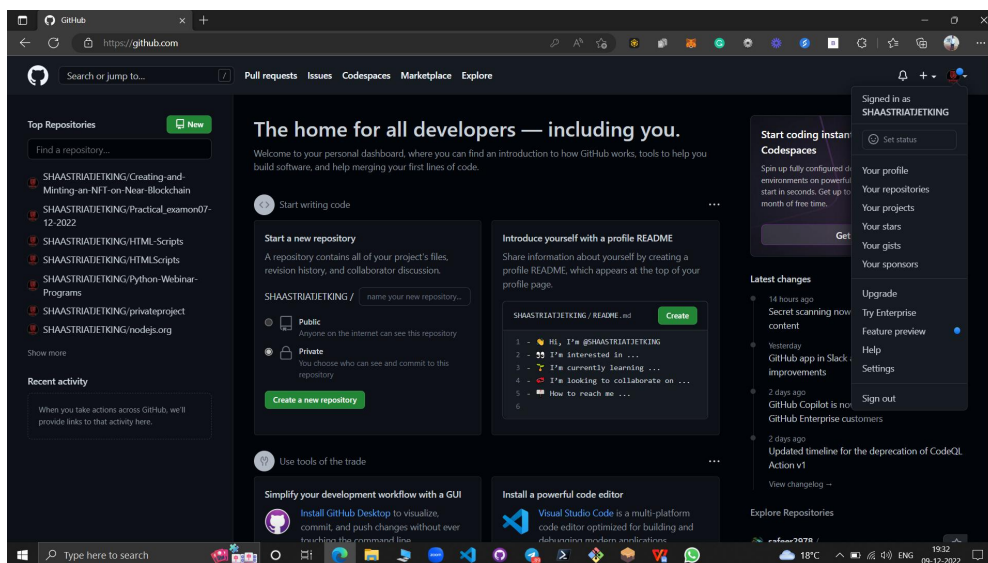

Use **Sign-up** option for creating GitHub.com account.

If you already having an account then use **sign-in** option for logging into your account on GitHub.com.

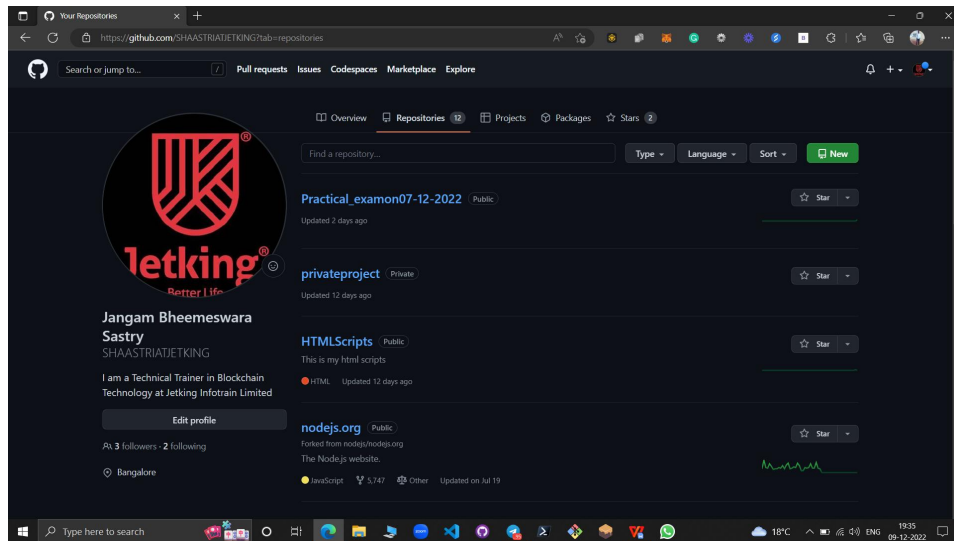

Step:4

After successful login into GitHub.com then click on right top corner like shown below:

Step:5

Then click on **your repositories** and create a new repository by clicking on **new** button.

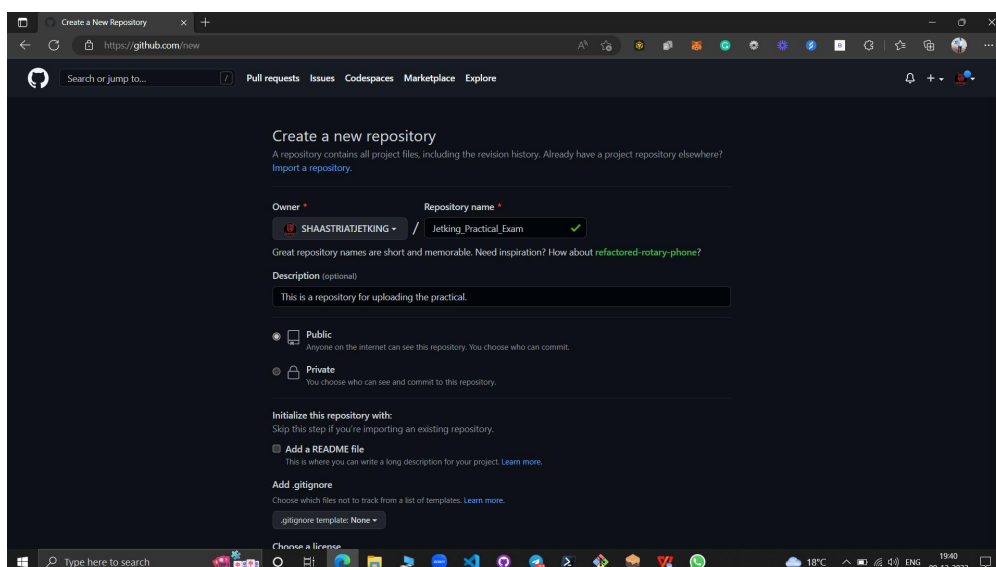

Step:6

After click the **new** button, provide the repository name as **Jetking_Practical_Exam**

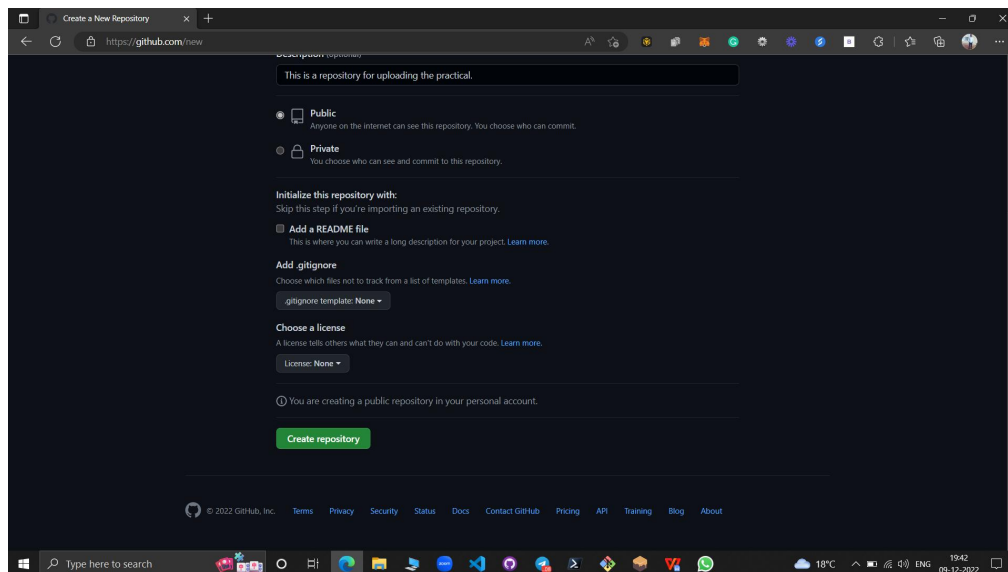

Next, provide the description as “**This is a repository for uploading the practical.**”

Next select **Public** for making the repository visible to anyone who uses your link of your repository.

Step:7

Finally, click on **Create repository**.

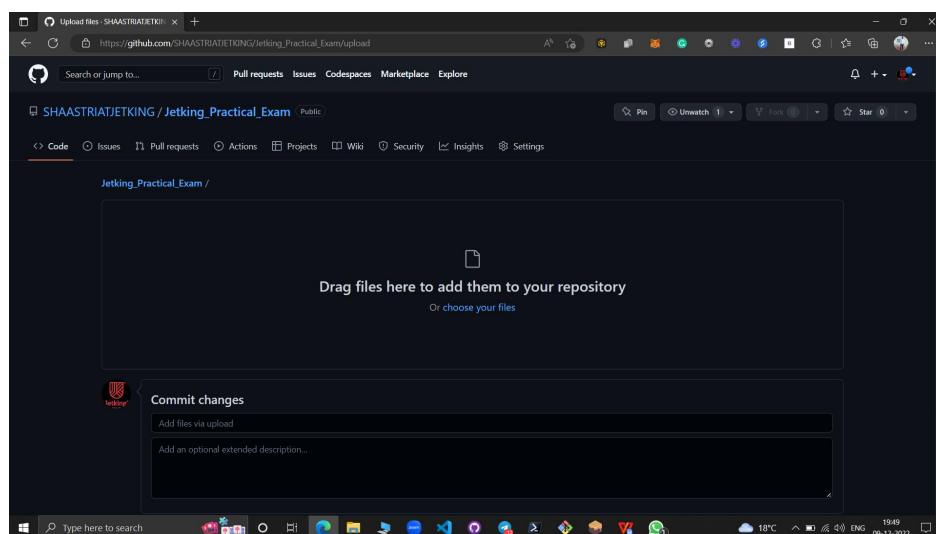

Step:8

Once your GitHub.com repository is created then try to upload the file which you have saved in your personal computer using an option called “**uploading an existing file**”.

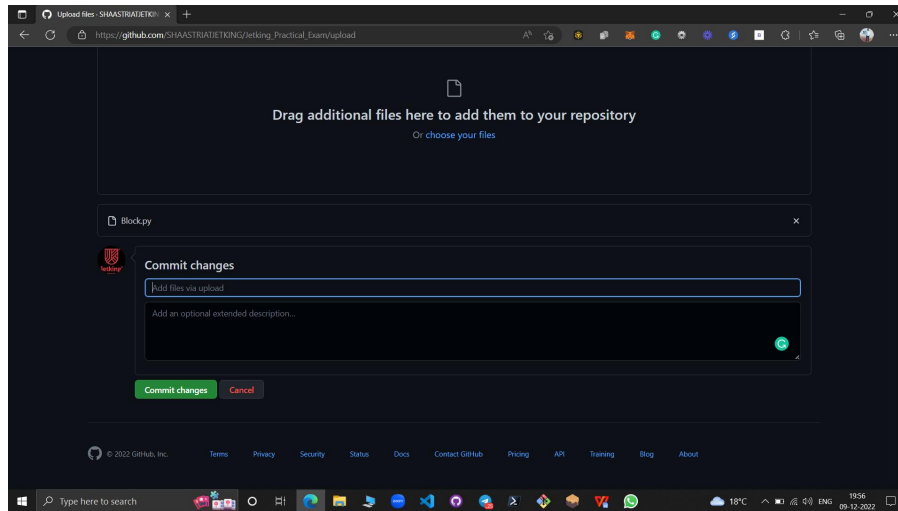

Step:9

After clicking that option, you will be able to see the option for choosing the files or even you can drag the files and drop in the window shown below:

Step:10

After uploading the files provide the **Practical_exam** name at Add files via upload option and click on commit changes button.

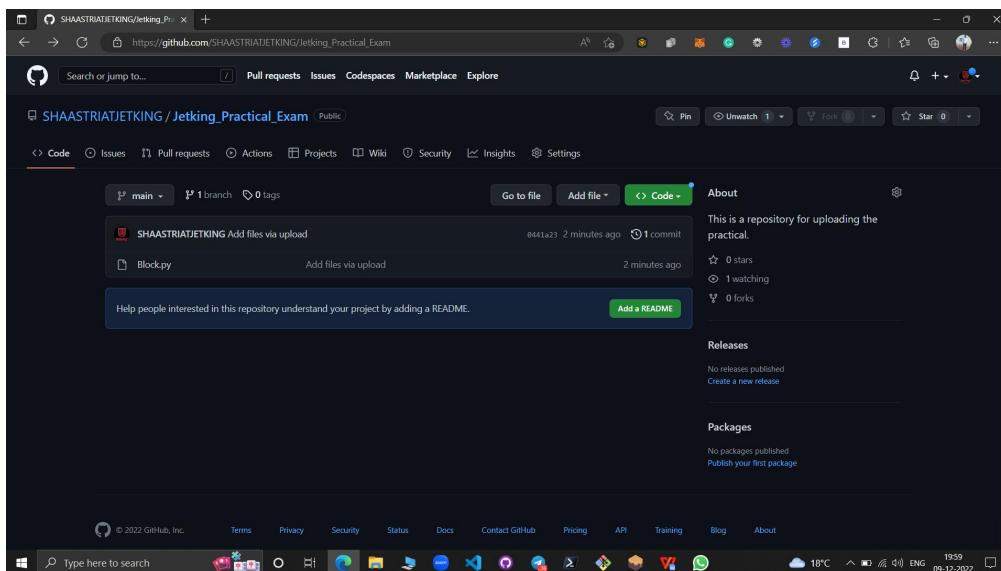

Step:11

After clicking on Commit Changes you can submit the link of your repository to exam branch.

Remember there will be only **one commit** for accepting your practical exam for evaluation like shown below:

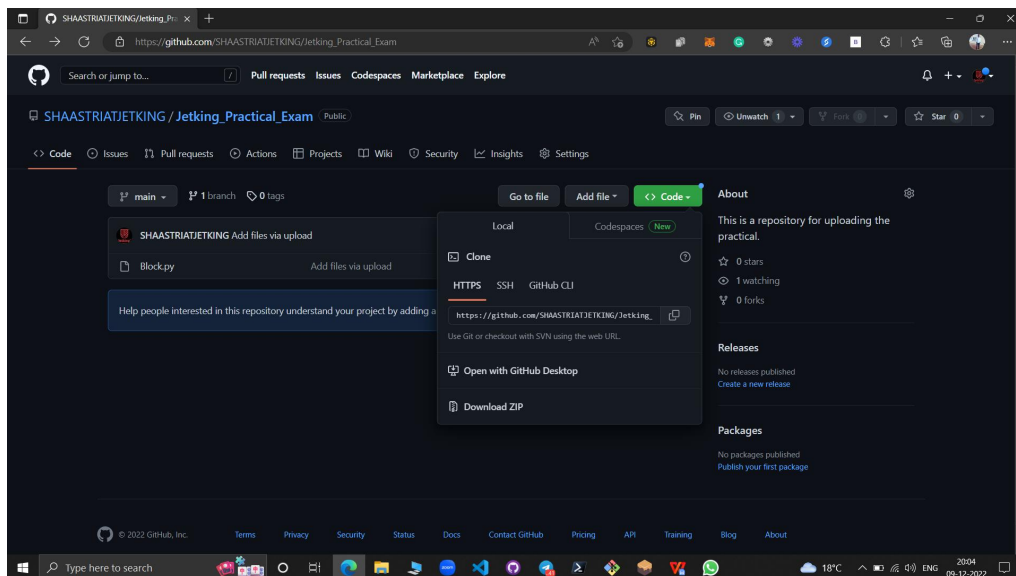

If you modify the code after submitting the link to exam branch then your exam will be went into withheld status.

Step:12

Now after committing the changes for only one time after uploading the files from your computer click on “<> **Code**” button and copy the link provided starting with https:// like shown below:

https://github.com/SHAASTRIATJETKING/Jetking_Practical_Exam.git

Congratulations!!!, You have successfully uploaded the practical and submitted the work to exam branch for evaluation.

Remember there will be only one commit you have to do before submitting the link.
